📍 blida, Algeria

📅 29-06-2001

🔗 Github

Motivated **Software Engineer with DevOps exposure**, focused on building reliable web applications and practical solutions to real-world problems. Hands-on experience with modern JavaScript frameworks (Nuxt.js, Vue.js), backend development using Node.js, and containerized environments (Docker, basic CI/CD). Strong interest in system design, automation, and optimizing development workflows for efficiency and scalability.

Currently pursuing a **Master's degree in Engineering**, bringing an analytical, engineering-driven approach to software development. Recognized for fast learning, adaptability, and a structured mindset when breaking down complex problems into implementable solutions. Comfortable working in startup environments, contributing across development, infrastructure, and product thinking while continuously improving technical and problem-solving skills.

## 📁 Experience

### Software Engineer, Goubba

07/2025 – Present

Hydra, Algiers, Algeria

At Goubba, a startup specialising in digital gift cards and innovative payment solutions, I contribute as a Frontend Developer using Vue.js to maintain and build intuitive and responsive user interfaces. I work closely with the product and design teams to translate UI/UX mockups into seamless, mobile-friendly experiences. Beyond frontend development, I actively support the team with my DevOps skills, optimising deployment pipelines, improving development workflows, and ensuring scalable, efficient infrastructure for fast-paced feature delivery. Key Contributions:

- Built responsive components and pages in Vue.js from AI/Demos designs.
- Collaborated on frontend architecture to ensure performance and maintainability.
- Provided DevOps assistance (CI/CD, environment configuration, Docker) to support smooth development and deployment.

### Software engineer, Gosim

07/2025 – Present
